ABOUT US

HonestHealth performs evaluation, testing, design, and software development exclusively for health care transparency efforts.

A close-up photograph of a person's hands typing on a laptop keyboard. The person is wearing a light-colored, textured sweater. The background is blurred, showing other people in an office or public space. A semi-transparent circular graphic is overlaid on the left side of the image, containing the text '50%'.

50%

**Today's patients are searching for

How the Tools Were Searched and Selected:

<http://www.healthcaretransparency.org/how-sites-were-found-and-selected/>

Examples Features of Physician Tools

| QUESTION NUMBER* | COMMON FEATURES | BENEFITS TO USERS | % OF ALL TOOLS WITH FEATURE | NY TOOL |
|------------------|--|---|-----------------------------|---------|
| Q 3 | Information About Clinical Quality of Care | Makes a snapshot of a physician's overall performance available in a single view | 49% | ✓ |
| P 23 | Price Information by Physician | Shows the price information at the granularity the consumer is looking for | 20% | ✗ |
| P 38 | Enter the Insurance Carrier | Allows consumers to get more specific data based on their actual coverage | 6% | ✗ |
| P 41 | Displays If a Doctor Is In-Network for User's Insurance Plan | One of the first questions consumers ask is whether or not a doctor is in-network | 4% | ✗ |
| P 43 | Displays the Co-Pay Amount | Shows the price information most relevant to the consumer, out-of-pocket costs | 10% | ✗ |
| P 061 | Price Information Based on Payment Data Sourced from Commercial Claims | Instead of estimates based on charges, actual claims are more reliable | 27% | ✗ |
| Q 20 | View Information for Physicians Side by Side | Enables users to quickly compare locations, performance, and other information in a single view | 59% | ✓ |

Example Features of Hospital Tools

| QUESTION NUMBER* | COMMON FEATURES | BENEFITS TO USERS | % OF TOOLS WITH FEATURE | NY TOOL |
|------------------|--|--|-------------------------|---------|
| P 23 | Price Information by Hospital | Shows the price information at the granularity the consumer is looking for | 32% | ✓ |
| P 24 | Enter the Insurance Carrier | Allows consumers to get more specific data based on their actual coverage | 81% | ✗ |
| P 28 | Displays the Co-Pay Amount | Shows the price information most relevant to the consumer, out-of-pocket costs | 77% | ✗ |
| P 35 | View Information for Hospitals Side by Side | Enables the ability to quickly compare care options | 74% | ✗ |
| P 065 | Price Information Based on Payment Data Sources from Commercial Claims | Instead of estimates based on charges, actual claims are more reliable | 8% | ✗ |
| Q 9 | Uses Non-Technical "Plain English" Language for Lay Consumers | Limits cognitive burden and helps consumers quickly process information | 65% | ✗ |
| S 15 | Summary View with All of a Hospital's Information | Makes a snapshot of a hospital's overall performance available in a single view | 62% | ✓ |
| Q 10 | Information About "Better Performers" and "Poorer Performers" | Allows users to view performance via evaluative symbols such as stars, rankings, and grades; reduces cognitive burden and makes it easier to compare hospitals | 54% | ✓ |

Example Features of Prescription Drug Tools

| QUESTION NUMBER* | COMMON FEATURES | BENEFITS TO USERS | % OF TOOLS WITH FEATURE | NY TOOL |
|------------------|---|--|-------------------------|---------|
| P 3 | Look up a Prescription Drug Including Dosage | Allows users to drill down to detailed prescription drug information and avoid unexpected financial surprises that could come with an increased dosage | 94% | ✗ |
| P 4 | Look up Pricing for a Prescription Drug by Pharmacy | Reinforces consumer choice and buying power, making it easier to comparison shop | 94% | ✓ |
| P 16 | Pricing for Compounded Medications Available | Allows ability to search for relevant drugs | 6% | ✗ |
| P 11 | Shows Generic and Brand Name Alternatives | Reinforces consumer choice and buying power, making it easier to comparison shop | 72% | ✗ |
| P 8 | Information Is Two Years Old or Less (from 2015, 2016, or 2017) | Offers recent data that are more relevant for making health care decisions, which evoke confidence in the tool and the sponsoring organization | 61% | ✓ |
| P 13 | Available in Spanish | Expands access and relevance to wider proportions of users | 50% | ✗ |

Summary of Health Insurance Purchasing Tools

| QUESTION NUMBER* | COMMON FEATURES | BENEFITS TO USERS | % OF TOOLS WITH FEATURE | ANY TOOL |
|------------------|---|--|-------------------------|----------|
| P 4 | Filters Insurance Carriers by Postal Code, City, or State | Makes results more targeted, meaningful, and relevant | 69% | ✓ |
| P 26 | Quality Ratings per Insurance Carrier | Provides users with quality information to assess with price | 22% | ✓ |
| P 9 | Shows Cost of Insurance Plan | Makes it easier for users to comparison shop and make budget-based decisions | 64% | ✓ |
| P 19 | Validates If a Specified Doctor Is In-Network | Allows consumers to ensure coverage with an existing provider | 31% | ✗ |
| P 12 | Shows In-Network/Out-of-Network Deductibles, Co-Pays, and Out-of-Pocket Costs | Provides users with more personalized, accurate information, making it more straightforward to comparison shop | 61% | ✓ |
| P 8 | Enter Prescription Drugs Used to Determine Drug Costs After Insurance | Allows consumers to estimate drug pricing given an insurance plan to better select coverage | 25% | ✗ |
| P 18 | Shows the Number of Doctors Within the Network in the User's Area | Allows users to assess coverage in their area | 19% | ✗ |
| P 23 | Filter Results by Metal Level (Platinum, Gold, Silver, Bronze) | Simplifies comparison shopping and allows users to quickly evaluate options | 56% | ✓ |

Selecting a Specific State to Review

The image shows a data table with columns: site domain, category, location, P 061 Pd from Claims (27%), P 062 Pd Clm Patient Carr (27%), and P 063 by P. The 'location' column is highlighted with a red box. A dropdown menu is open for the 'location' column, showing options: Sort Ascending, Sort Descending, Clear Filter from 'location', Text Filters (highlighted with a red box), and Filter... The 'Text Filters' option is also highlighted with a red box. A search dialog box is open, showing a search field with 'NY' entered (highlighted with a red box) and 'OK' and 'Cancel' buttons.

Driving Healthcare Transparency with Actionable Resources

Best Practices for Transparency Tools

Highlighting Eight Best Practices

Best practices are a combination of:

- Research
- Consumer and Stakeholder Feedback
- Usability Studies
- Experience

CENTER FOR IMPROVING
VALUE IN HEALTH CARE

MHDO Maine Health
Data Organization
Information | Insight | Improvement

Developing and Maintaining Transparency Tools

1

Incorporate innovative features that are easy to use.

- Adhere to consumer-focused content creation and responsive web design.
- Limit cognitive burden:
 - Take a “less is more” approach and drill down to detailed information.
 - Utilize plain language, symbols and word icons.

Symbols and Roll-Overs on CompareMaine

The screenshot displays the CompareMaine interface with the following elements:

- Navigation:** 'List' and 'Map' buttons at the top left.
- Search Section:** Includes a search radius dropdown (set to 'within 25 miles of'), a 'City or ZIP Code' input field, a 'Search' button, and a 'Show prices by insurance company' dropdown (set to 'Show all insurance companies').
- Filtering and Sorting:** A 'Compare Selected Facilities' button, a 'Sort by' dropdown (set to 'Facility Name'), and a link for 'Average Total Cost'.
- Facility Comparison:** Two hospital entries are shown:
 - Blue Hill Memorial Hospital:** 57 Water Street Blue Hill, ME 4614. Average total cost: \$3,521. Metrics include Patient Experience, Preventing Serious Complications (N/A), and Preventing Healthcare-Associated Infections (C. diff). A callout box provides a cost breakdown: Facility Cost - \$2,565 and Professional Cost - \$425.
 - Bridgton Hospital:** 10 Hospital Dr Bridgton, ME 04009-1148. Metrics include Patient Experience, Preventing Serious Complications (N/A), and Preventing Healthcare-Associated Infections (C. diff).
- Callout Box:** A green-bordered box explains that the average total cost is broken out into costs paid by an insurance company and an insured individual. It details the breakdown for Blue Hill Memorial Hospital: Facility Cost - \$2,565 and Professional Cost - \$425.

Developing and Maintaining Transparency Tools

2

Tailor information to consumers.

- Information that is meaningful drives transparency and actionable engagement.
- Seek feedback from consumers and key stakeholders throughout the process.
 - Consumer Advisory Group
 - Usability Studies
 - Interviews

Developing and Maintaining Transparency Tools

3

Establish a clear information hierarchy.

Develop a framework that organizes measures and incorporates consumer-friendly definitions.

- The Agency for Healthcare Research and Quality supports the framework by the Institute of Medicine, which highlights the six aims for the health care system:
 1. Safe
 2. Effective
 3. Patient-Centered
 4. Timely
 5. Efficient
 6. Equitable

Framework for NH HealthCost

Patient-Centered Care

Meeting a patient's wants and needs.

Timely Care

Reducing waits and harmful delays for those who give and receive care.

Effective Care

Providing services proven to get results.

Safe Care

Protecting patients from medical errors and does not cause harm.

Quality Care

Quality care is getting the care you need when you need it. NH HealthCost provides you with a convenient way to see nationally available quality data on local health care facilities. You'll find a wealth of information, compiled from different sources, to help you make better healthcare decisions.

Medicaid Quality Information System

The New Hampshire Department of Health and Human Services manages a tool, the Medicaid Quality Information System, which is dedicated to the reporting of Medicaid program quality metrics. For additional information and to access these reports, please visit <http://medicaidquality.nh.gov/>.

I'm interested in the quality of:

Developing and Maintaining Transparency Tools

4

Relate cost data to an individual's personal situation.

- Help consumers determine the amount they can expect to pay out of pocket.
 - Base cost estimates on a dollar amount that represents the total amount paid for a health care service by both consumers and insurers, as derived from payment data from commercial claims.
 - Display bundles of care and outline what is included in the cost estimates.
 - Allow consumers to filter plan options to compare quality, benefits and costs.

Developing and Maintaining Transparency Tools

5

Focus on quality measures that are meaningful and methodologically sound.

- Use nationally accepted quality measures, such as those outlined by the National Quality Forum.
- Provide comprehensive clinical quality-of-care information in multiple categories.
- Display quality measures that consumers care about:
 - Patient-Centeredness
 - Effectiveness
 - Safety of Medical Procedures
- Clearly define the methodologies.
- Distinguish between good and poor performers.

Developing and Maintaining Transparency Tools

6

Present cost and quality data side-by-side to demonstrate value.

- Guide consumers away from the common misconception that high price means high quality.
- Ease comparison of multiple providers and services.
- Enable users to easily and quickly identify high-value providers (high-quality, low-cost).

Adult Preventative Care Office Visit (or Wellness Office Visit)

| Procedure | Average Total Cost | Maine State Average |
|--|--------------------|---------------------|
| New patient preventative care visit for adult, ages 18 to 39 | \$196 | \$198 |
| New patient preventative care visit for adult, ages 40 to 64 | \$207 | \$222 |
| Preventative care visit for adult, ages 18 to 39 | \$157 | \$165 |

Developing and Maintaining Transparency Tools

8

Build an audience.

Building a website alone is insufficient to foster change in consumer behaviors.

- Coordinate with existing user channels to educate and engage audiences.
- Promote the site:
 - Influencers
 - Marketing Materials
 - Press Releases
 - Social Media
- Regularly update the data and site content.

Thank You

Amanda Dunker

Policy Associate, Community Service Society

Advancing Health Care Transparency in New York

Amanda Dunker
Senior Health Policy Associate
Community Service Society of New York

Who We Are

- The Community Service Society of New York has advocated for low-income New Yorkers for over 170 years through research, advocacy, and direct service
- The Health Initiative Department's programs help over 130,000 New Yorkers obtain and use health coverage annually, in every part of the state

CSS Facilitated Enrollment for the Aged, Blind and Disabled Program
Network agencies and counties served / 2016-2017

We've Got You Covered

Transparency Efforts in New York

- Original All-Payer Claims Database legislation passed in 2011, in recent years the State has held annual stakeholder meetings but much of the work is behind the scenes
- Many past public facing efforts:
 - New York State Physician Profiles
 - NYS Health Profiles: Hospitals
 - Prescription Drug Costs in New York
 - New York State of Health
 - New York State Provider and Health Plan Look-Up

Advocacy strategies

- CSS and Health Care for All New York tracked State activity and tried to participate in state workgroups on the APCD, but public opportunities to provide comments/participate have been less frequent than with other advocacy issues
- Movement required more targeted effort - the Governor mentioned transparency in his State of the State last year which created a conversation starter
 - Governor's office
 - Department of Financial Services
 - Department of Health

Our talking points:

1. New York's information is hard for consumers to navigate; there's no centralized tool to support consumers trying to shop for care.
2. New York has done a lot of work to get information to consumers about health care; however, its tools lack some features that consumers in other states have already.
3. New York's tools are not comprehensively leveraging the data being collected in the APD.

We needed New York specific data to prove that consumers care and a way to directly compare New York to other states.... The combination of research and advocacy funding was a great opportunity to move forward!

There were report cards and some survey data that helped:

- Catalyst for Payment Reform report cards include every state – New York has gotten an “F” every year
- A Public Agenda survey talked to New Yorkers and helped make the case that they ARE looking for price information and that they prefer it come from the State

We also had many examples of conversations Navigators and advocates have with consumers every day

- Choosing plans:
 - “What kind of cost-sharing makes sense for my situation?”
 - How can I be sure my doctors are in-network?”
- Finding a doctor:
 - “Which doctors near me are open on the weekend?”
 - Which are the best at treating my condition?”
- Comparison shopping for hospitals and facilities:
 - “Which are safest?”
 - Which charge the lowest prices?”

But the Honest Health tool let us do a much better evaluation of transparency in New York

- The criteria was a big step forward – gave advocates a much more in-depth understanding of what was possible and what already exists

Physician
 Hospital
 Prescription Drugs
 Insurance

CSS talked the State through each of the Honest Health categories

New York's insurance tool: New York State of Health

Best Practices:

- Easy to compare monthly costs
- Uses simple icons

Room for Improvement:

- No cost calculator that can support decision-making
- Provider directory not integrated into comparison tool
- Explanations of quality measures are not very detailed

California's insurance tool: Covered California

Best Practices:

- Gives recommendations based on your expected use (ex. number of visits or prescriptions a year)
- Search is easy
- Includes quality info using simple icons
- Comparison tool integrates provider directory

Room for Improvement:

- Quality only available after plan has been available for two years
- Quality info not detailed

<https://www.coveredca.com>

www.cssny.org

Minnesota's insurance tool: MNSure

Best Practices:

- Clear estimated costs
- Recommendations based on your expected use (ex. number of visits or prescriptions a year)
- Specific drug coverage info

Room for Improvement:

- Comparison tool does not integrate provider network
- Quality measure explanations are several screens away

<https://www.mnsure.org>

www.cssny.org

Our final recommendations:

1. Increase consumer engagement

- Create a comprehensive, centralized decision support tool WITH consumers – develop and test drive prototypes WITH consumers before launch
- Motivate other stakeholders to improve transparency of information when the State can't directly, for example mandating insurers to provide price information to members
- Provide data to external stakeholders through open data

2. Obtain adequate funding to support these efforts and maintain transparency in how funding is used

3. Use claims data collected through the APD to add cost and quality features to consumer tools

Emilio Galan

Cliff Rayman

Chief Technology Officer, Honest Health

Consumers **trust their state** to present reliable health care transparency information.¹

NYDOH has grant-funded two **pilots to prototype price and quality transparency tools** for consumers in part based on this work that will be tested by focus groups this coming year.

The pilots described in this presentation were supported by the Funding Opportunity Number PR-PRP-13-001 from the US Department of Health and Human Services, Centers for Medicare & Medical Services. The content of this report is solely the responsibility of the authors and does not necessarily represent the official views of HHS, HHS agencies, HRI/NYSDOH

NY Health Nexus Prototype

A chat interface to help New Yorkers navigate existing resources and data.

Background on Nexus

- NYSDOH wanted to allow NY residents to find all relevant healthcare websites easily and more quickly.
- HonestHealth built the Nexus prototype, which allows plain English language search queries to be entered, and chat with the user to clarify the query when needed.
- The tool can be embedded into different tools to allow easy searching regardless of starting place including
- One example includes: [NYS Health Connector](#)

Example Nexus Queries

Me 2:14pm
Are other patients happy with New York Druid?

NY Nexus 2:14pm
There are a number of different options. Which of the following do you want information for?

- Joe Hormell Imaging at New York Druid
- New York Druid Hospital - Woodside Druid Center**
- New York Druid Hospital - Roger Hospital
- New York Druid/Spiro Valley Diagnostic Radiology
- New York Druid Woodside

NY Nexus 2:14pm
Overall Patient Satisfaction at 'New York Druid Hospital – Woodside Druid Center' was measured at 68.33%. This ranks it 3128 out of 4126 facilities. Please visit this link www.profiles.health.ny.gov/newyorkdruid_woodside_hospital for more detailed information.
