

LOW-VALUE CARE

.vs

HIGH-VALUE CARE

EXAMPLES

Unneeded diagnostic testing

Unneeded imaging

Bloodwork for low-risk surgery

Use of branded drugs when generics are available

Elective/unwarranted C-sections

EXAMPLES

Getting a flu shot

Cancer screening when appropriate

Coordinating care for complex patients

Prenatal care

Eye screening for diabetics

Spending wasted on low-value care is estimated to be between \$76 and \$101 billion each year.

Providing more high-value care could avoid costly care later, saving between \$89 and \$111 billion each year.
