HEALTHCARE VALUE HUB

State Has Active Legislation

State Does Not Have Active Legislation

The Health Care Value Hub ("the Hub") is proud to launch the 2025 Health Care Affordability Policy Snapshot ("Affordability Snapshot"). The Affordability Snapshot provides legislators, consumer advocates, regulators and other interested parties a tool to compare their state's health policies across other states.

The categories examined in this resource explore a variety of policy options that impact health care affordability. Policies were examined for whether they were active, implemented to a limited degree, or not active as of June 1, 2025. Sources for this information can be found in the downloadable **Data and Source Document available on the Dashboard page. Definitions and descriptions for each policy category can be found in the Glossary.**

The Hub offers online and hands-on support with staff dedicated to understanding health care policy and connecting advocates and other interested parties together to help build a patient-centered, high-value healthcare system. As a research-based organization, the Hub takes a comprehensive approach to improving affordability through policy analysis, translation, visualization, and collaborative engagement. We encourage advocates, legislators, and other stakeholders to share our findings to improve consumer health care affordability across the states.
